

# Upgrade Liverpool Street Station

We are finalising our plans to upgrade Liverpool Street station and want to share them with you.

Our vision is to create a world-class, accessible transport hub with the station becoming a landmark seven-day-a-week destination for passengers, visitors and the local community.

Step free access throughout, by providing **6 new lifts** (all fully accessible), making the station easier to use for those with luggage, children or disabilities.

Twice the amount of concourse space, with **60% more** ticket barriers and **6 new escalators**.

New public green spaces, gardens and a new Public Lido

The proposed transformation of the station will deliver greater accessibility and a world-class passenger experience at no cost to passengers or the taxpayer.

To find out more, visit us in person or online.
